

LGT RANGE

LED TRACK LIGHT SYSTEM

The LGT track system has been created to combine with our LTL spotlights. The modular nature of the track makes for a versatile system which can be constructed in many different ways and is easy to adapt / extend as necessary. The track comes as standard in 1m or 2m lengths, but it can be easily cut on site to any length required. The system can be surface mounted or suspended, and supplied to allow for DALI dimming of the LTL spotlights (minimum order quantities apply).

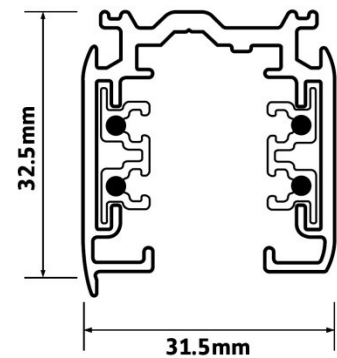

ORDERING INFORMATION

LGT/2M	Three circuit track - 2m length		Black / White
LGT/1M	Three circuit track - 1m length		Black / White
